

# **Ascentage Pharma Group International's Environmental Management Policy**

## **1. Overview**

The purpose of this policy is to strengthen the environmental management and supervision responsibilities of Ascentage Pharma Group International and its subsidiaries (hereinafter referred to as the "Company", "we", "us" or "our") and actively practice the concept of environmental protection, continuously improve the company's environmental management level, improve environmental performance, reduce the potential impact of waste gas, waste water and hazardous waste discharge in the process of production and operation on the basis of legal compliance, and strive to assume corporate responsibility.

## **2. Scope of Application**

This Policy applies to all manufacturing operations of the Company and its affiliates.

## **3. Supervision and Audit**

The Board of Directors of the Company is responsible for regularly reviewing the Company's environmental management policies and performance, regularly reviewing the progress of environmental goals, continuously monitoring the achievement of goals, and supervising the implementation of environmental policies.

## **4. Comply with laws, regulations, and internal systems**

The company strictly abides by the environmental management related laws and regulations in locations of the subsidiaries, and regularly improves and revises the company's internal "Environmental Management System Manual", optimizes the environmental management system, and promotes the company to carry out environmental protection management in accordance with the requirements of ISO 14001 environmental management system certification standards.

## **5. Environmental management**

The company promises to regularly review the company's environmental management in the form of internal audit and third-party audit, and carry out internal audit of environmental impact covering the whole operation site every year, including the production process, the operating environment of pollution prevention and control facilities, and the final hazardous waste transportation and disposal environment, so as to ensure the strict implementation of environmental management work such as pollutant discharge standards.

In order to reduce the impact of its own operations on the environment, the company has formulated environmental goals in four dimensions: reducing greenhouse gas emissions, reducing waste, improving energy efficiency and improving water efficiency, based on policies, industry analysis and its own environmental practices, which have been incorporated into the company's development plan to guide the company's environmental management.

## **6. Waste and Emission Management**

The company is committed to strict emission monitoring and management of waste gas, wastewater and hazardous waste, and to reduce pollutant emissions through treatment technology improvement while ensuring that the discharge standards are met.

### *Exhaust gas management*

The company promises to strictly ensure that the exhaust gas emitted meets the "Comprehensive Emission Standards for Air Pollutants" and "Emission Standards for Air Pollutants in the Pharmaceutical Industry" and other specified standards, and effectively controls the flue gas, smoke, odor gas, toxic and harmful gases generated in the process of production, drug research and development and operation.

### *Wastewater management*

The company is committed to regularly monitoring the discharge of wastewater, and if environmental standards are exceeded, it will immediately find out the cause and take corrective and preventive measures, and strictly control the wastewater generated in all aspects of the operation.

### *Hazardous waste management*

The company is committed to handing over all hazardous waste to qualified contractors for disposal, and strictly controlling the records of hazardous waste in and out of storage. The company has set a goal of zero hazardous waste to landfill and is committed to further standardizing the management of hazardous waste discharge.

## **7. Resource management**

The company is committed to integrating climate change into the entire process of production and operation, proactively identifying climate risks and actively taking measures to address them.

The company is committed to actively promoting energy conservation and emission reduction and strengthening its own low-carbon practices in terms of energy structure transformation, energy-saving management, and green office.

The company is committed to the efficient use of water resources, regularly inspecting and improving equipment to reduce unnecessary water waste.

The company is committed to maximizing the reuse of recyclable waste in an appropriate way and improving resource efficiency.

## **8. Supplementary Provisions**

If there are any matters not covered in this policy, or if it is contrary to the relevant laws, regulations or normative documents, it shall be implemented in accordance with the relevant laws, regulations and normative documents.

This policy is formulated, revised and interpreted by the EHS Department of the Company, approved by the Board of Directors, and effective from the date of issuance.
